## FIND YOUR CAREER TODAY WITH INDIANA STATE GOVERNMENT!

Be a part of Indiana's robust and well-coordinated Geographic Information System (GIS) community. The Indiana Office of Technology has a great opportunity for the right individual to build upon a strong foundation of existing talent and resources.

**YOU could lead Indiana GIS into the next decade!**

**Indiana State Geographic Information Officer** The State of Indiana is seeking a geographic information officer (GIO) to lead state government and statewide efforts to build, integrate, maintain, and distribute statewide framework data and execute responsibilities defined under the new Indiana Code 4-23-7.3 Indiana GIS Standards. The successful candidate will be an appointee of the Governor, reporting to the State Chief Information Officer (CIO). Responsibilities Coordinate with the Indiana Geographic Information Council ([www.igic.org](http://www.igic.org)) <http://www.igic.org> ), the State Data Center (a division of the Indiana State Library), and other organizations to:

- Create, integrate, maintain, and distribute the IndianaMap - Indiana's statewide base map of GIS framework data
- Administer data exchange agreements
- Prepare funding proposals for grants to enhance coordination and implementation of GIS
- Provide public access to GIS data and framework data through the electronic gateway administered by the Office of the GIO, the State Data Center, and in locations throughout Indiana
- Leverage the IndianaMap data and infrastructure to effectively and efficiently support the business missions of its stakeholders, including to provide access to the Indiana Business Research Center for "Information for Indiana"
- Maintain a statewide inventory of current and planned GIS data and framework data and applications
- Represent the state's interests to federal agencies regarding the National Spatial Data Infrastructure, framework data, spatial data exchanges, cost leveraging opportunities, spatial data standards, and other GIS related issues
- Coordinate with state educational institutions for the purpose of promoting GIS service, research, and educational opportunities
- Promote the GIS high technology enterprise and employment within Indiana
- Publish a biennial report on the progress of the statewide data integration plan
- Lead the State GIS Center of Excellence (GIS COE), which is the council of all state agencies with GIS investments. The GIS COE exists to ensure that state agency resources are aligned and to build an enterprise GIS architecture and applications that effectively

and efficiently support the business missions of state agencies, departments, commissions, and boards.

The GIO will also:

- Develop an annual state enterprise GIS work plan, including an enterprise security plan with back-up and recovery
- Develop and enforce GIS policies for state agencies
- Review and approve the procurement of GIS goods and services involving the state data center or a state agency
- Provide business justifications and marketing strategies for implementing the state enterprise GIS system
- Coordinate with the United States Board on Geographic Names by serving as the chair of a committee formed with the IGIC as the state names authority for Indiana
- Administer the budgetary responsibilities of the electronic map maintenance fund, including communicating to elected officials the business case to secure funding to administer I.C. 4-23-7.3
